

Technical FAQ

Will it replace my AGM battery?

Many KPower Lithium batteries are designed as direct drop-in replacements for common Group sizes. Verify dimensions and charging compatibility before installation.

Do I need a special charger?

Use a charger designed for LiFePO4 batteries with the recommended charging profile.

Can I connect batteries together?

Only use approved series or parallel configurations for your specific model.

How should I store my battery?

Store in a cool, dry environment and recharge every two months during extended storage.

What does the warranty cover?

The limited warranty covers manufacturing defects under normal use. Submit warranty claims through the Dealer Portal with proof of purchase and battery information. Most claims are reviewed within three business days.
